📄 PROFILE

UI/UX and **Software Engineering** undergraduate passionate about designing intuitive **digital experiences** and **solving real-world user problems**. Skilled in **frontend development**, **user-centered design thinking**, and **AI-driven product** experiences with experience in building interactive web applications and collaborative projects.

🎓 EDUCATION

BTECH in SOFTWARE ENGINEERING (2023-2027)
JAIN DEEMED TO BE UNIVERSITY

Present
Bangalore, India

CGPA - 8.4

🧠 SKILLS

Programming Languages — Python | Java | JavaScript

UI/UX — Figma | Prototyping | User Flows | Design Thinking | Usability Principle | Responsive Design

Frontend Technologies — HTML | CSS | JavaScript | React.js

Backend & Web Technologies — Flask | RESTful API Development | Node.js | Express.js

Databases — SQL(ProstgreSql) | MongoDB

Core Concepts — Data Structure & Algorithms | OOP | Problem Solving

Tools — Git | GitHub | VS Code | Postman

AI and Product Tools — OpenAI | Prompt Engineering

🌐 LANGUAGES

English • Telugu • Tamil • Kannada • Hindi • Japanese — (Learning)

📁 PROJECTS

Testify by Trustify | Incepatrix 2.0 Hackathon – Top 10 Finalist

- Developed an AI-powered cybersecurity platform to detect malicious websites through URL and webpage analysis, improving user safety and interaction experience.

Tech Stack: React, Vite, TypeScript, APIs

Campus Connect (Social Networking App)

- Designed and implemented RESTful APIs and backend logic to manage user interactions, posts, and events in a scalable system.

Tech Stack: HTML,CSS,JavaScript,Node.js, Express.js, MongoDB

Code2Flow (Web App for Code Visualization)

- Developed backend services using Flask to process source code and generate interactive flowcharts, improving code understanding and visualization.

Tech Stack: HTML,CSS,JavaScript,Flask, D3.js,JavaScript, CodeMirror

Contactless Dine-In (Full Stack Web App)

- Developed a QR-based web application supporting digital menu access, order placement, and online payments. Designed backend components for real-time data handling and seamless system flow.

Tech Stack: HTML,CSS,JavaScript,Node.js, Express.js, MongoDB, QR Code API

📜 CERTIFICATES

Google IT Automation for Python
(coursework completed)

Front End Web Development Certification
Infosys Springboard

Introduction to Database
Meta Professional Certificate(foundational coursework)

★ INTERSHIPS

Web Development Intern | RD Infrotechnologies

- Developed responsive web pages using HTML, CSS, and JavaScript
- Applied structured coding and debugging practices; collaborated on feature implementation and code quality improvement

★ EXPERIENCE & EXTRACURRICULAR ACTIVITIES

Incepatrix 2.0 Hackathon – Top 10 Finalist | Jain (Deemed-to-be) University

- Built an AI-based cybersecurity solution to detect suspicious websites and potential online scams by analyzing URLs and webpage data in a competitive hackathon environment.

Grass Root Research & innovation (CORE TEAM MEMBER)

- Contributing to innovative research projects, idea development, and real-world problem-solving through collaborative experimentation and creative thinking.

2025 – Present

FOSS Club Member - Event Management, Jain University

2024 – Present

- Coordinated technical events including *Code Relay* and *Alumni Talk*, supporting planning, outreach, and event execution.
